

Acceptability of the methods in other markets

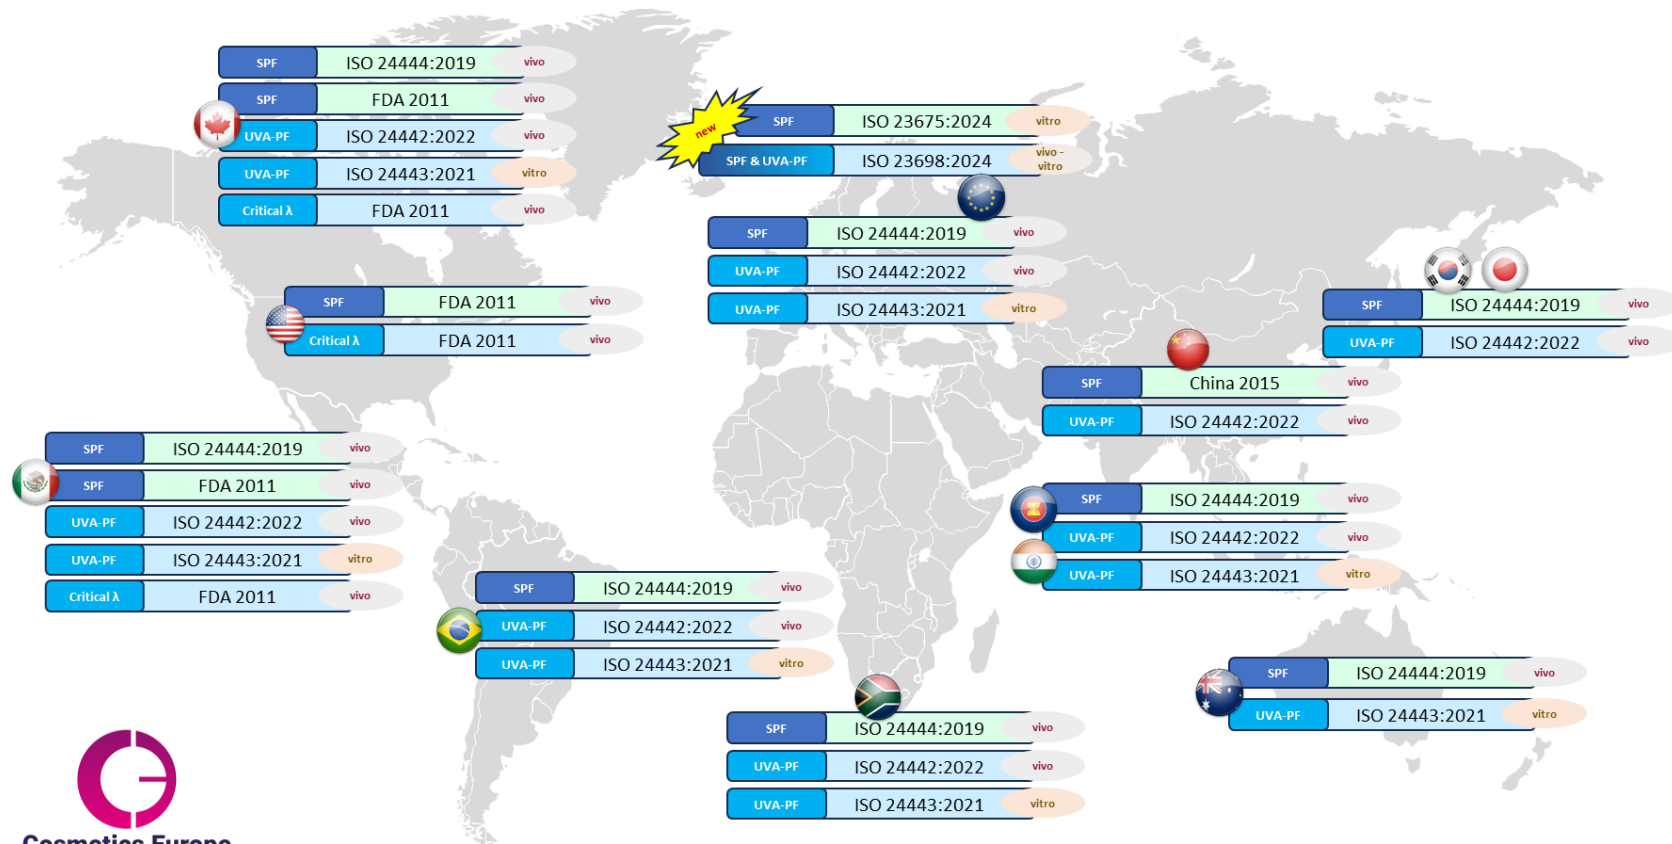

08/07/2025

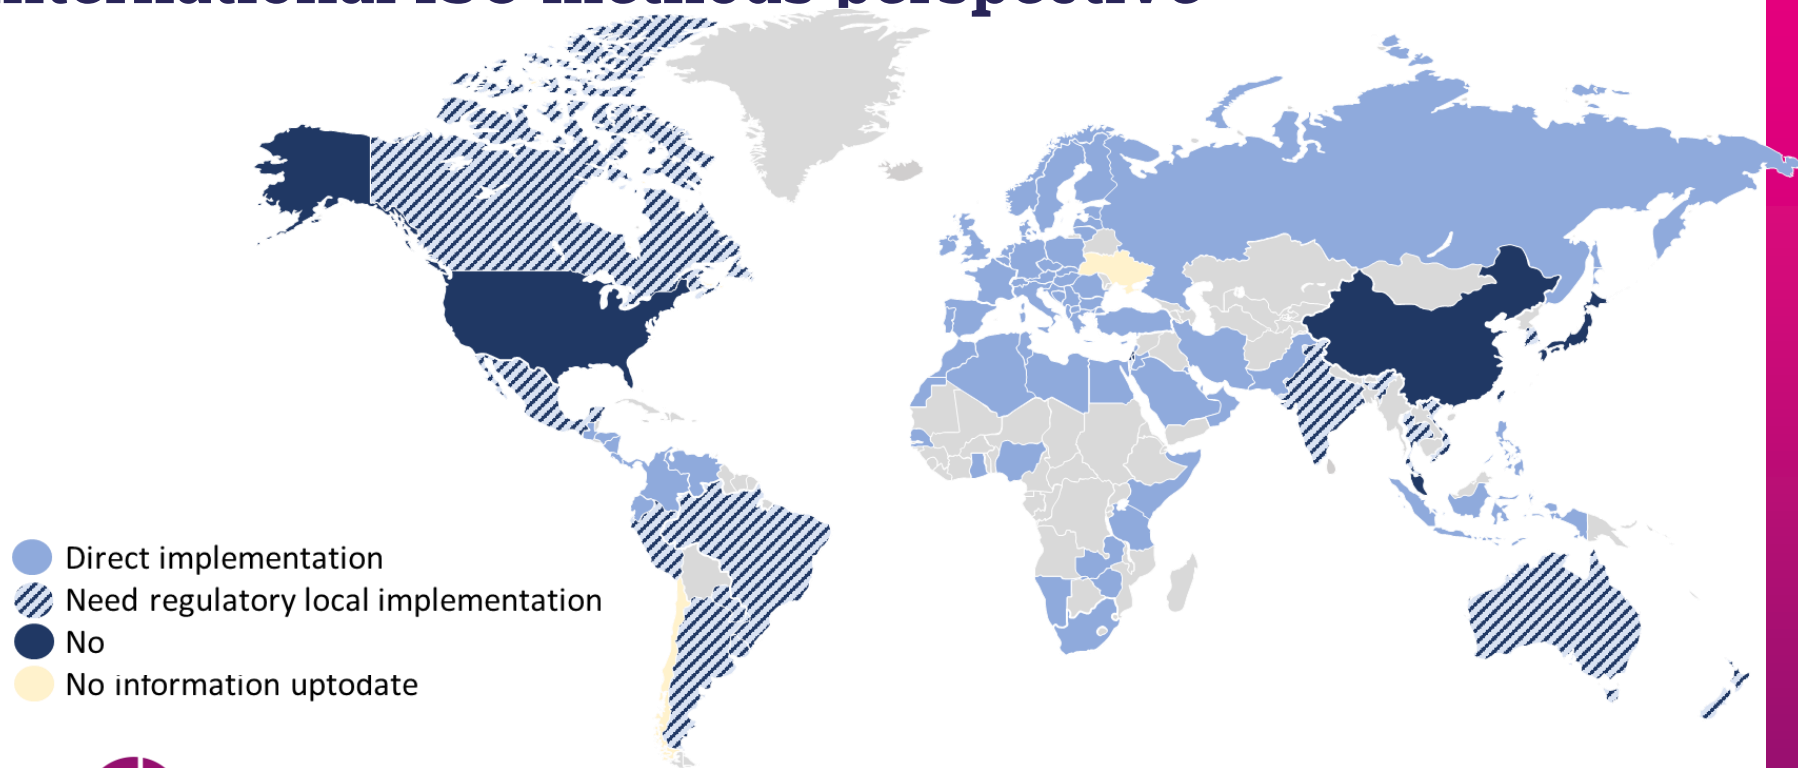

International ISO methods acceptance

- Implementations of ISO methods is **of voluntary adoption**
- Depending of the region of the world the implementation of the method could differ, there are 3 categories:
 - Countries with their own methods (e.g.: US FDA) and legal basis: would require the update of both, could be difficult
 - Countries which refers to ISO standards into their regulation: would require the update of the legal basis, could take some time
 - Countries that recommends or tolerates the use of ISO or do not have any specific reference to ISO texts

International ISO methods perspective

International ISO methods perspective

Future of implementation of International ISO methods for SPF determination

- Cosmetics Europe is engaging through discussion with authorities and dedicated workshop to present the DPM method internationally
- Different countries may look at the situation in the European Union in 2025 with the use of the new methods
- Could expect for next year more countries recommending/adopting/ formally recognise new ISO methods

Thank you !
